

HUGGS: Baby Carrier Product Description

Maximum Safety for your Growing Baby

HUGGS is a new innovative baby carrier. The traditional carrier only has a fabric lining unlike the foam insert in Huggs booster seat. This promotes good posture, weight distribution, and maximum comfort.

HUGGS is unique for its all season aspects. If it's hot or cold, your baby will be comfortable. The inside layer vents air while the outside layer has foam padding, maintaining the baby's comfort level.

The HUGGS baby carrier is unique, well-constructed and more comfortable than anything on the market today.

Features

- **Hip Seat:** Lessens the stress and distributes weight evenly across the hips, thigh and pelvic, giving optimal support for spine development and maximum comfort.
- **Multiple Positions:** The HUGGS carrier has four adjustable positions
- **Weight Distribution:** Padded shoulder straps, booster seat and waist belt distribute the baby's weight across the parent's shoulders, hips and back.
- **Head Covering:** Is removable, open it provides solid support for head and neck. Made of breathable material for cool air flow and avoiding moisture buildup.
- **All season carrier:** Vent for the heart and zipped up during the winter.
- **The four positions:** Ergonomic to keep the baby comfortable.
