Corporate Identification

If a company's logo is the doorway by which businesses enter, corporate identities are the person opening the door. At its simplest, corporate identities are the persona of the company, a mixture of its philosophies and its branding.

Corporate identities are found in the manner of dress the employees wear, to its logo, from how it communicates to the public, and to how it is manifested within the company itself. We at Platinum Logo Design want to help you identify you wish for your company to be received.

What does your company do now?

Logo Design

Logos are to business what the front door once was: the first thing you see, the first impression you get. If the doorway needed paint or the window was cracked, then people would get the notion that if who maintained the doorway doesn't care, then how can they care about me? Logos must be clean and distinct enough to conjure up exactly what your company brings and who you are.

Enter Platinum Logo Design. We will create a unique, lasting logo that you will be proud to use for years to come.

Logo design seems simple but, like dance or sports, what looks so simple and easy takes skill, discipline, and hard work. For example, what colour or colours would you prefer? What do certain hues subconsciously evoke? Do you want clean, modern lines or something reminiscent of days gone by? These are only a few questions that we at Platinum Logo Design will ask our

clients. You will have a team of designers and project managers tailoring your logo to your needs and wants.
